B- Reading Comprehension (16 Marks)

16

- Read the following passage carefully, then answer the questions that follow:

Yesterday, I watched a scientific movie on the National Geographic Channel about white sharks. It was amazing, and I learned a lot about this giant fish.

White sharks live in the oceans, mostly in cool waters close to the coast. The white shark got its name from its white belly. The top of the white shark is grey, which helps it blend with the rocky bottom of the ocean. White sharks are **carnivores,** or animals which eat meat. They eat sea animals such as seals, dolphins, and other fish.

White sharks are super swimmers. They have an amazing sense of smell. It helps them detect even one drop of blood in 25 gallons of water. They can grow up to 6 meters long, which is half the length of a bus. They have 300 sharp, triangle-shaped teeth arranged into seven rows. If a shark loses a tooth, another one moves forward and takes **its** place. So, it is impossible for the sharks to be seen without a full set of teeth. It is something so special for the white sharks only.

From a, b, c or d, choose the most suitable answer: (6X2=12 Marks)

09. The **best title** for this passage would be:
    a. Scientific Trip
    b. White Sharks
    c. Blue Oceans
    d. Friendly Dolphins

Mock- Asma

10. The underlined word **'carnivores'** in the **2nd** paragraph means:
    a. giant animals
    b. cool waters
